

RSPT 1237

Exam 2 Review

1. Know the definitions of:
 - a. First-degree heart block
 - b. Second-degree heart block, Type I
 - c. Second-degree heart block, Type II
 - d. Third-degree heart block
 - e. Bundle branch block
 - f. Paroxysmal atrial tachycardia
 - g. Supraventricular tachycardia
 - h. Wolff-Parkinson-White Syndrome
 - i. Sinus exit block
 - j. Sinus arrest
 - k. PAC
 - l. Atrial fibrillation
 - m. Wandering atrial pacemaker
 - n. Wandering junctional pacemaker
 - o. Heart blocks
2. Know the alternate names for:
 - a. Second-degree heart block, Type I
 - b. Second-degree heart block, Type II
3. Know what the following dysrhythmias look like:
 - a. PAC
 - b. Atrial flutter
 - c. Atrial fibrillation
 - d. Wolff-Parkinson-White Syndrome
 - e. Junctional bradycardia
 - f. All of the heart blocks
4. Where do the following dysrhythmias originate from?
 - a. Sinus
 - b. Atrial
 - c. Junctional
5. What kind of waves does atrial flutter have?
6. What waveform is the common identifier for junctional dysrhythmias?
7. Rates for the following rhythms:
 - a. Sinus bradycardia
 - b. Sinus tachycardia
 - c. Junctional bradycardia
 - d. Accelerated junctional rhythm
 - e. Junctional tachycardia
